ABSTRACT:

PURPOSE: To obtain a natural fur-type pile product having characteristics further close to a natural fur, i.e., having a soft touch feeling such as that of the natural fur, a coloring effect by a double layered structure and a raised nap structure closely resemble to the natural fur, and excellent in blooming properties.

CONSTITUTION: This pile product comprises the pile part which is constituted by 20-98wt.% shrinking yarn of solution dyed acryl based synthetic fibers having 1-10 de, $\geq 15\%$ shrinking ratio and ≤ 0.230 static friction coefficient between the fibers, and non-shrinking fibers having 3-40de and flat cross sections or oval cross sections, and has a 2-70mm difference in pile length between the shrinking fibers and non shrinking fibers.
